

COMPUTER BASICS: A PRELIMINARY COURSE FOR KIDS FROM 4 YEARS OLD

- WHAT IS A COMPUTER
- MOUSE CONTROL
- CLICKING & DRAGGING
- KEYBOARD BASICS
- TYPING TEXT
- OPENING & CLOSING PROGRAMS
- ICONS & FOLDERS
- DRAWING ON SCREEN
- FOLLOWING INSTRUCTIONS
- STAYING SAFE ONLINE
- SCROLLING & NAVIGATING

A gentle, hands-on introduction to computers for children with no prior experience. This preliminary course isn't about coding, it's about giving kids real comfort and independence using a computer as an everyday tool: mouse control, typing, opening programs, and basic navigation. By the end of 12 weeks, your child will move confidently around a screen on their own.

COMPUTER BASICS: A PRELIMINARY COURSE

from 4+ years old

PRACTICAL, EVERYDAY SKILLS

①

Motor Skills

Mouse control, clicking, and drag-and-drop, so using a computer feels as natural as holding a pencil.

②

Cognitive

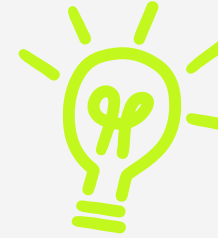

Following on-screen instructions and understanding cause-and-effect — the "if I click this, that happens" logic every tool user needs.

③

Confidence

Real independence: opening a program, finding a letter, closing a window — without needing an adult to do it for them.

OUR TEACHING METHOD

Curiosity

Patience

Independence

Confidence

VALUES AND ETHICS

HANDS-ON, NOT SCREEN- PASSIVE

①

Projects

Small real tasks each week: type a name, draw a picture, open and close a program on their own.

②

Technology

Simple, age-appropriate tools built for first-time users, not coding platforms.

③

Activities

Physical practice before screen time, so hand-eye coordination is built before it's tested on-screen.
